Issue 23 of Ansar al Sunnah's magazine summarizes their previous two weeks activities

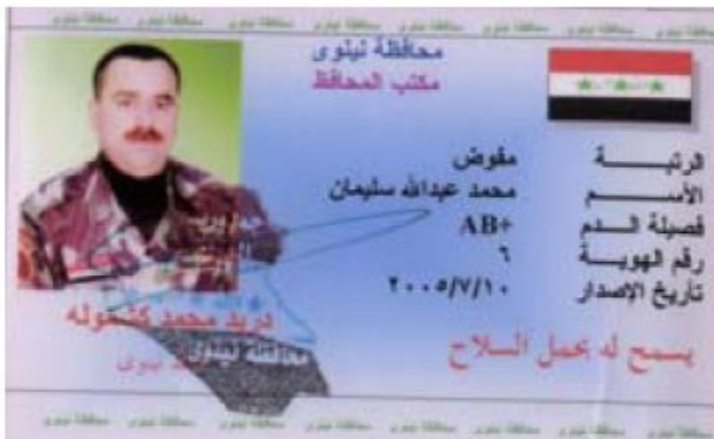

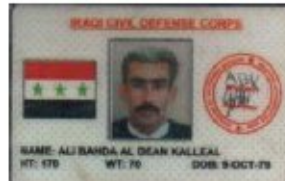

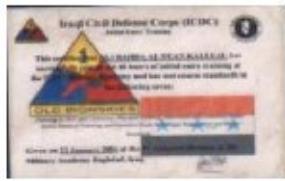

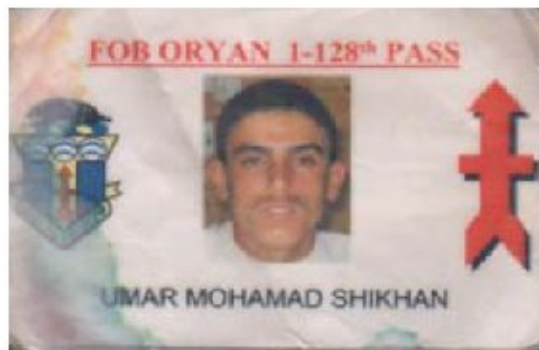

This magazine, dated the 4th day of Shaban 1426 on the Islamic calendar, corresponding to September 8, 2005, summarizes the activities of the Army of Ansar al Sunnah in Iraq

(Jaish Ansar al Sunnah fe Iraq). The publication covers the two week period between the 22nd of August and the 6th of September, 2005.

The 28-page “magazine”, published in PDF and DOC format, includes a summary of the daily attacks conducted by the group.

One paragraph summaries of twenty-nine different operations are included in the publication.

The publication also outlines the kidnappings and executions it has conducted, and where they have the ID’s of the victim, they include a copy along with the summary.

The publication includes an illustrated article showing the mujahideen launching missiles on American targets. (The images were apparently taken from a video released several weeks ago.)

The publication also includes an illustrated “tutorial” describing the use of the Dragonov SVD weapon, which appears to have been copied from an internet webpage published in English.

(Special thanks for Archangel)
